

The IDEC Group's Global Network

IDEC Group

The IDEC Group is a leader in the control equipment industry. Its members, IDEC CORPORATION and its domestic and overseas Group companies, have been working in close cooperation with one another to pursue global development.

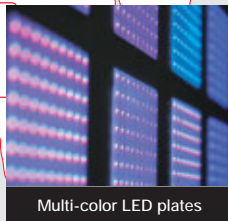

Library management system

IDEC CONTROLS LIMITED

<http://www.idec-controls.com/>

IDEC CONTROLS LIMITED mainly imports and sells security systems. While continually making direct contact with customers to fully grasp their needs, the company provides outstanding products from both Japan and overseas alongside products that it has developed independently, with specifications adjusted to meet requirements. Its main products are library management systems, article surveillance systems (preventing shoplifting), laser system applied products, printing equipment (marking systems) and RFID system products.

Multi-color LED plates

IDEC OPTO DEVICE CORPORATION

<http://www.idec-opto.co.jp/>

IDEC OPTO DEVICE CORPORATION is responsible for the development of LEDs. The Company has continued to propose a new application of LED illumination as part of its mission to accelerate the realization of an LED society. The company specializes in the manufacture of optical semiconductor devices, LED-applied products, and parts for electronic equipment, such as LED lamps, surface emitting LED units, LED arrays, devices for use in sensors, and products with solar applications (solar batteries). The company is practicing custom-oriented manufacturing that pursues the needs and wants of increasingly sophisticated and diversified advanced fields.

Company Name (Location)	Capital Stock	Ownership Interest	Main Business
