

Revision history of WindO/I-NV2

Version 1.10 Dec/22/2006 2nd release

Runtime System Software

New feature/Improvement

No.	Item	Contents
1	Error check	Added the error information in the converted project when the converted project had some error. With the information, WindO/I-NV2 can check whether the project is valid or not before downloading the project without saving project.
2	Error message	Added a button to open the error log file on the error message opened after converting project. Also improved the message in the error log file.
3	Help	Added troubleshooting regarding LSD 7 to the help.

Bug fixing

The following bugs have been fixed.

4	Project Setting	Fixed the problem that Link No. of Host I/F Driver tab on Project Configure for HG1A/1B isn't converted to Station No. for HG1F.
5	Special Character	Fixed the problem that symbol of IBM or IDEC font isn't converted properly.
